

Little Bugs Club!

A fun, interactive monthly garden club for kids ages 4-12!

Spring 2019 Schedule

March 16 – Love Letters from the Garden

Love bugs are sure to enjoy this month's writing lab! We will talk about love letters we have received, make our own love letters, and practice delivering letters around the garden and in our own new Mailbox!

April 20 - Water Bugs!

In these science class-themed little bugs, we will be busy at work in the little bugs' "garden lab" figuring out how bugs glide on water, how plants "drink", and celebrate the new water features in the garden.

May 18 - Fairy Garden Festival!

Little Bugs this month is on the same day as our annual Fairy Garden Festival! Several Fairy Garden workshops will be offered please check our website for registration details.

June 15 - A Garden of Culinary Delights!

Nothing beats growing your own food! Join us for culinary class where we will examine which parts of plants we eat and learn what really makes a fruit, a fruit! Little bugs will leave with their own recipe for a healthy treat made in class.

July 20 - Road Trip! Geography in the Garden!

Get ready to travel around the garden! We will pilot our new learning stations as a "swarm" of bugs! We will also leave a treasure for our friends to find in a garden geocache!

*All sessions at 10am • Cost is \$10 per child
